Main Distribution Frame 91 M

Main Distribution Frame 91 M

Preferred frame variant for 1200 pairs (2 x 600 pairs) for accommodation of 10-pair LSA PROFIL modules on the system and line sides. It can be configured as follows:

- Wall-secured standing distribution frame (Standing distribution frame, fixed to the wall)
- Freestanding distribution frame, single-sided (Freestanding distribution frame, fixed to the ceiling)
- Freestanding distribution frame, two-sided (Freestanding, back-to-back distribution frames, screwed together, fixed to the ceiling)

Advantages of this main distribution frame solution:

- Modular, space-saving installation
- Optimal adaptation to available space
- Minimal installation time, since the frame is delivered pre-assembled

This type of frame has the module installation for the line and system sides vertically in a single profile frame. This allows jumpering within a single vertical row.

The standard design has a distance of 250 mm between vertical rows and is sold as a 2-bay frame for vertical installation.

The maximum connection capacity per distribution frame of the preferred variant is 1200 pairs (2 x 600 pairs) for the system and line sides. Other frame sizes and their connection capacities are shown below. Setting up banks of distribution frames of arbitrary length is possible, taking into account that the jumpering capacity of the horizontal jumper guides is approx. 4000 pairs (jumper with Ø 0.9 mm).

If required, the distribution frames can be equipped with back-mount frames for LSA-PLUS modules or for MDF 71 connection components (installation dimensions: 290/210 mm).

Note: See the Configuration Description (Order-No: 6577 3 995-00) for the configuration of MDF 91 M distribution rows.

MDF 91 M with profile frame (d = 46 mm), equipped

Main Distribution Frame, COM Series

Main Distribution Frame System COM 91-2

- Dimensions according to ETSI norm
- Compact design results in higher connection density
- The racks are flexible in their vertical/vertical design
- Suitable for all KRONE switching equipment (copper, coax, fibre optic)
- Delivered unassembled

The main distribution frame system is designed for 10-pair LSA PROFIL modules on the system and line sides (it can be modified for 8-pair LSA PROFIL modules).

In this frame model the insertion slots for the modules on the line and system sides are arranged vertically above each other on a single fixed profile frame. This layout makes jumpering possible within the same vertical.

The standard frame comes with 250 mm spacing between verticals; it is available in a 2-vertical version.

MDF COM frames consist of powder-coated (colour: grey; RAL 7032) steel sections, the fixed profile frames are made of stainless steel. All the components of the frame and profile frames and the frame accessories are connected to a common earth potential. Connection points for an FPE cable (min. cross section: 50 mm² copper) to the main earth conductor are accessible at the top and bottom bars of the frame.

The connection capacity of a distribution frame totals 1200 pairs (2 x 600 pairs) for the system and line sides. Distribution frames can be combined to form banks of any length. Note, however, that the horizontal jumpering capacity is about 3200 pairs (jumper diameter 0.9 mm) and vertical jumpering capacity is about 1300 pairs (jumper diameter: 0.9 mm).

The MDF COM 91-2 can be configured for the following design variants:

- Wall-fixed distribution frame
(free-standing distribution frame, secured to the wall - see illustration)
- Free-standing distribution frame, single-sided
(free-standing distribution frame, secured to the ceiling)
- Free-standing distribution frame, double-sided
(free-standing distribution frame, secured to the ceiling, bolted back to back).

Main Distribution Frame, COM Series

- 2) Item has to be installed if necessary.
 3) Item includes components for a travelling-ladder stop at the ends of a bank of distribution frames.
 4) Item is used for the ends of a bank of distribution frames, if necessary.

Main Distribution Frame, COM Series

Main Distribution Frame, COM Series

Main Distribution Frame System COM 80-2

The main distribution system is designed for 8-pair LSA PROFIL modules on the system side and 10-pair LSA PROFIL modules on the line side (it can be modified for 10-pair and 8-pair PROFIL modules, respectively). In this frame model the installation areas for the modules on the line side are arranged vertically, on the system side horizontally, on a fixed profile frame. The standard frame comes with a 225 mm spacing between verticals and it is available in a 2-vertical and a 4-vertical version. MDF COM frames consist of powder-coated (colour: grey; RAL 7032) and galvanised steel sections; the profile frames are made of stainless steel.

All the components of the frame and profile frame and the accessories of the frame are connected to a common earth potential. Connection points for an FPE cable (min. cross section: 50 mm² copper) to the main earth conductor are accessible at the top and bottom bars of the frame.

The MDF COM 80-2 can be configured for the following design variant:

- Standing distribution frame, double-sided (free-standing, secured to the ceiling* - see illustration)
- Delivered unassembled

* included in the delivery

Distribution frames can be combined to form banks of any length, taking the total jumpering capacity of the 8 horizontal jumpering levels of approx. 12,000 pairs into consideration (jumper diameter: 0.9 mm).

Connection capacity per distribution frame:

2 verticals	System side:	1024 pairs 1280 pairs (with 10-pair modules)
	Line side:	1200 pairs
4 verticals	System side:	2048 pairs 2400 pairs (with 10-pair modules)
	Line side:	2400 pairs

One LSA PROFIL label holder can be placed between each 100 pair block on the vertical side and between each 128 or 256 pair block on the horizontal side.

The pitch of the modules is 25 mm (module + 2,5 mm spacer).

Main Distribution Frame, COM Series

Main Distribution Frame 71

Main Distribution Frame 71

The MDF 71 racks are based on an especially clear matrix structure with a vertical arrangement of the line side and a horizontal arrangement of the system side. Thanks to their variable layout, the racks can be adapted to any given space.

The main distribution frame rack consists of powder coated (colour: grey; RAL 7032) tubular and angular sections for mounting of the various MDF 71 blocks. Employing any extension rack of the same height, all the racks can be extended in both directions.

The racks are delivered unassembled.

Note:

A design and layout guide (Order-No: **6044 3 016-00**) is available.

Main Distribution Frame 71

Disconnection Block 71

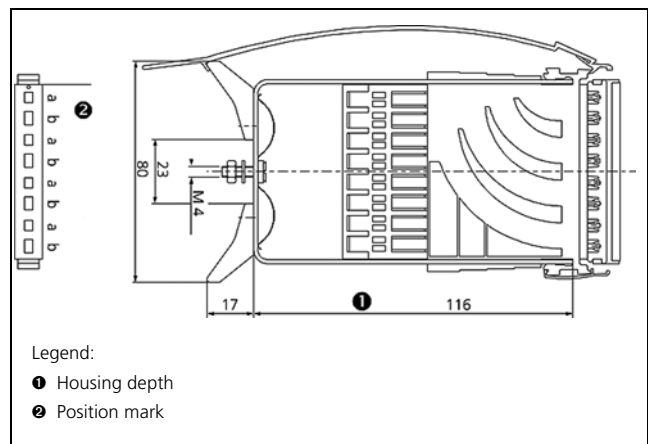

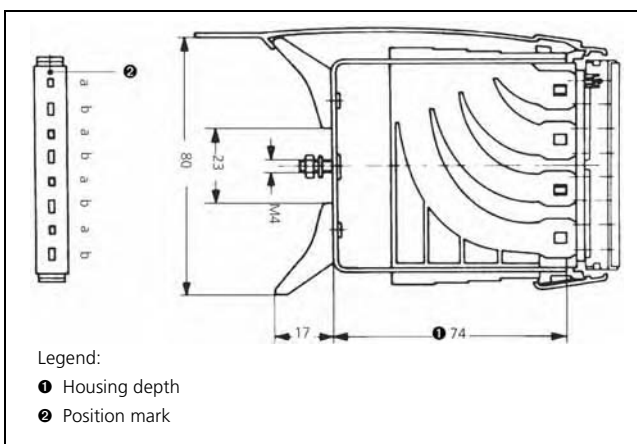

The MDF 71 connection blocks comprise a perfected MDF system (used as standard equipment by Deutsche Telekom AG, for example). All of the variants are fitted with LSA-I-71 contacts for the connection of plastic-insulated copper wires without soldering, wire-stripping or the use of screws. Copper wires with a conductor diameter of 0.40 to 0.65 mm and a maximum overall diameter of 1.1 mm can be used..

Main Distribution Frame 80

Main Distribution Frame 80

The MDF 80 racks for LSA-PLUS Series 2 components are a modular system which can be used in almost any configuration, depending on the space available and the cable capacities. The rack of the main distribution frame consists of powder-coated (colour: grey; RAL 7032) horizontal and vertical sections for installation of the various LSA-PLUS back-mount frames. The vertical and horizontal mounting rails have a mounting pitch of 50 mm.

Employing any extension rack of the same height, all the racks can be extended in both directions.

- Horizontal/vertical design, double-sided
- Installation of LSA-PLUS modules and back-mount frames with a pitch of 25 mm (they are not included in the delivery and has to be ordered separately)
- Recommended back-mount frames:
6441 3 250-17 (horizontal) and
6442 3 250-11 (vertical)
- Ceiling support rail with expansion elements x (for adjustment to different room height)including in the delivery
- Installation guide and mounting materials for complete installation of the rack
- Delivery condition: unassembled

Note:

A design and layout guide (Order-No: **6044 3 016-00**) is available.

Other Wall-Mounted Distribution Racks

Wall-mounted Distribution Rack, KWGL

These wall-mounted distributor racks can accommodate **LSA-PLUS back-mount frames** or **equipment of the 71 series**.

- 2 to 5-vertical versions are available
- Bay spacing (centre to centre): 210 mm
- Cable support rail and earth bar included
- A sufficient number of cable guide rings are fitted horizontally and vertically
- Suitable for installation in data cabinets (except for direct installation in 19"-racks)
 - 2-vertical version in cabinets with a width/depth of 600 mm
 - 3-vertical version in cabinets with a width/depth of 800 mm
- Arranging in rows with other rack units is possible but total jumpering volume must be taken into consideration; extension kit, consisting of standard parts, must be ordered separately (Order-No: 6569 3 052-11)
- Back-mount frames have to be ordered separately (Recommendation: Order-No: 6442 3 250-..)
- Fixing components and standard parts (lateral C rails, connecting elements, M6 and M8 nuts, bolts, toothed washers) for installation in the KRONE cabinet system must be ordered separately (Order-No: 6569 2 053-02)

Material:

Rack: steel C sections, galvanised, yellow-chromized
 System rail: square section, 2 mm steel sheet, galvanised, yellow-chromized

Delivery:

Fully assembled, including material for wall mounting

Other Wall-Mounted Distribution Racks

Distribution rack (with two verticals)

Distribution Rack

The modular distribution racks can directly accommodate LSA-PLUS and LSA PROFIL modules series 2. As delivered, the installation width for the modules is 95 mm but the rack can easily be refitted for 75 mm (8-pair modules).

- Capacity: 690 pairs (with one vertical) or 1380 pairs (with two verticals)
- Set-up options: freestanding (single-sided or back-to-back) or wall-mounted (front, back and side panels are available on request)
- Two distribution racks can be fixed together with bolts (not included in delivery) to form a bank
- For a bank we recommend that the installation be limited to 5000 pairs (the volume of the jumpers has to be taken into account!)
- A sufficient number of cable guides are pre-installed

Material: sheet-steel
Colour: black (similar to RAL 9011)

Scope of delivery:

Distribution rack (completely assembled) without wall-fixing material

Order data:

Order-No:	Description	Weight/Pack	Pack
6420 1 013-00	Distribution Rack (with two verticals) Dimensions: 2004 x 570 x 150 mm (H x W x D)	29.000 kg	1 piece
6420 1 050-00	Distribution Rack (with one vertical) Dimensions: 2004 x 285 x 150 mm (H x W x D)	16.000 kg	1 piece

Other Wall-Mounted Distribution Racks

LSA-PLUS® Wall-mounted Distribution Kit

The LSA-PLUS wall-mounted distributor is a quick mounting rack which can accommodate up to 4 self-supporting back-mount frames. Depending on the purpose of the distributor, the back-mount frames can be equipped with connection or disconnection modules of the LSA-PLUS Series 2 range. Each kit has a distribution capacity of up to 1600 pairs.

Kits should not be arranged in rows (jumping volume should be observed!)

Scope of delivery:

- 2 Mounting plates
(can accommodate LSA-PLUS back-mount frames)
- 2 C-rails, 695 mm
- 10 Cable guide rings (closed)
- Mounting instruction

Dimensions:

- Total width: 695 mm
- Fixing width: 609 ± 3 mm

Height:

The total height H and the fixing height C result from the used LSA-PLUS back-mount frames (pitch 22.5 mm, depth of cable space 50 mm) as follows:

Order-No:	Piece	Distribution height in mm C	H
5267 3 585-00	1x 10 + 1	333	465
5267 3 585-01	2x 10 + 1	565	697
5267 3 585-02	3x 10 + 1	798	930

Order data:

Order-No:	Description	Weight/Pack	Pack
6577 1 011-04	LSA-PLUS wall-mounted distribution kit	5.100 kg	1 piece

Other Wall-Mounted Distribution Racks

Wall-mounted Distribution Rack, KWGP

These wall-mounted distribution racks can directly accommodate **LSA PROFIL modules** with a fixing dimension of 95 mm. They **cannot** be refitted for modules with a fixing dimension of 75 mm.

- 2 to 5-vertical versions are available
- Bay spacing (centre to centre): 210 mm
- Cable support and equipotential bar installed
- A sufficient number of cable guide rings is fitted both horizontally and vertically
- Can be installed in data distribution cabinets (but not directly in 19" racks)
 - 2-vertical version in cabinets with a width/depth of 600 mm
 - 3-vertical version in cabinets with a width/depth of 800 mm
- Arrangement in rows with other rack units is possible but the jumpering volume has to be taken into account; Extension kit, consisting of standard parts, must be ordered separately (Order-No: 6569 3 052-11)
- Fixing and standard parts (lateral C rails, connecting elements, M6 and M8 nuts, bolts, toothed washers) for installation in the KRONE cabinet system must be ordered separately (Order-No: 6569 2 052-02)

Material:

The rack is made of C sections, galvanized, yellow-chromized Profil rod: stainless-steel tubing, 12 mm in diameter

Delivery:

Fully assembled; material for fixing the rack to the wall is included in the delivery

Other Wall-Mounted Distribution Racks

LSA PROFIL® Wall-mounted Distribution Kit

Basic-kit

The LSA-PROFIL wall-mounted distributor rack kit is used for fast installations onto walls or into 19" systems. Up to 3 profile bays can be mounted on the 500 mm long C rails. Each profile bay consists of two round rods (800 mm long) and 2 LSA profile rods 95, as well as a sufficient number of jumper guides, which are mounted on the upper and lower C rails. Each bay can accommodate up to 32 LSA PROFIL modules, which means that a 3-bay distributor can accommodate up to 960 pairs (gross). Banks of distributor racks can be set up; however, they should be limited to two basic kits (the jumpering volume has to be taken into account!).

Two kits are available

- Basic kit
- Extension kit

With the exception of the two 500 mm long C profile rails in the basic kit, the two kits contain the same components and the same number of each component.

Material:

Rack: steel C profiles, galvanized (yellow-chromized)
 Mounting plates: sheet-steel
 Jumper guide hooks: plastic

Scope of delivery:

Kit (unassembled), without fixing material

Dimensions:

Total width: 500 mm
 Refer to illustration for individual dimensions

Order example:

Requirement for one distributor with 3 bays:

- One basic kit (Order-No: 9101 1 010-00) and
- Two extension kits (Order-No: 9101 1 011-00)

Order data:

Order-No:	Description	Weight/Pack	Pack
9101 1 010-00	LSA PROFIL wall-mounted distribution rack, basic kit	3.000 kg	1 set
9101 1 011-00	LSA PROFIL wall-mounted distribution rack, extension kit	2.000 kg	1 set
